"MAPSYS Case Suite" (MCS) is an intuitively designed software product that allows for customizable management of Case, Financial, Reporting and Workflow processes within the constructs of both public and private legal institutions.

Comprehensive Case Management built for Indigent Defense, with Indigent Defense.

With supplemental modules such as Reimbursement, Enterprise Document Imaging Foundations (E-DIF) and Workspace Plus, the MCS platform allows for seamless integration throughout your business systems. Specifically reporting, finance and communication (email/text).

MCS Core

MCS is able to provide role-based functionality, as well as the critical business insights and infrastructure that are required to manage the many permutations within the case lifecycle. And because it was designed in collaboration with indigent defense offices (by Public Defense for Public Defense), "MCS" comes out of the box ready to meet the very specific needs and requirements of the Public Defense arena.

Workspace Plus

Workspace Plus is a **persistent** dashboard system. Any change you make to the workspace, including filters and tile sizing/positioning, are all saved automatically and are available when you log back in. With Pre-built custom tiles that a user can select and dynamically adjust to their profile, users have the ability to customize their data views in charts, graphs and tables.

Enterprise Document Imaging Foundations (E-DIF)

Based on the proprietary MAPSYS software, Document Imaging Foundations (DIF), E-DIF is an enterprise level document management module that can be integrated with the MCS product. E-DIF includes document scanning, document management, workflow customization, full text indexing of documents, redaction and permission based viewing, e-sign and signature and annotation.

Reimbursement

Time is money. The Reimbursement module was created to provide the Public Defense office with the ability to track both of those items for each case. Leveraging this critical information allows for greater transparency and the ability to set and track billable expense levels by case, by attorney and by firm.

Custom Application Development

"MCS" is backed by MAPSYS, a 35-year-old Services and Solutions Firm with a team of over 30 Developers and Subject Matter Experts, able to provide the customized changes, enhancements and data migration support that each implementation may require. That expertise comes from more than just "MCS", MAPSYS has also developed and deployed the Ohio Public Defender Online CMS application and the Franklin County Public Defender application.

MCS Integration – Technology that works for you!

Since users are looking for a seamless experience in the management of their work, whether they are managing cases, offices or people, MCS is designed to integrate with the key features and functions of your business. Better technology = better service.

Applications »

- Calendar integration and sync with iCal
- Microsoft Word & Outlook Addin
- Reimbursement and Financial System integration

Document Management »

- Document Automation with mail merge
- External File Sharing
- Full Text Indexing, Redaction and E-Sign (E - DIF)

Systems »

- E-Filing Integration Capability
- Analytics and Reporting Integration (Power BI, Tableau, SSRS)
- Data Freedom (no restrictions to data export)

Convenience »

- Client Text Notification - Never miss an event
- Mobile Scheduling
- Custom User Experience - Saved dashboards and advance search

Not in the office? Not a problem with MCS Mobile

Knowing that your users are not always in the office to access the system, MCS Mobile brings the system to them! Incorporating the core scheduling functionality and notification system, MCS Mobile allows for remote access to case files, scheduling and even provides text/email notifications to Clients to remind them of their court appearance. In 2020, MCS Mobile will add more dynamic Alerts & Trigger functionality.

Why MAPSYS
